

## What is SharePoint?

SharePoint refers to the products and technologies created by Microsoft. You can use SharePoint to set up collaborative sites to share information, manage documents and publish reports.

Keep everyone on the same page.

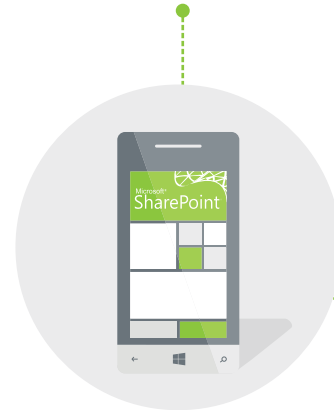

Tech solutions tailored to your business.

## How do we use SharePoint?

We start by learning your business and gathering important requirements for development. In the end, you're delivered an expertly crafted product that is optimized for your business.

## Own a Windows 8 phone?

You're in luck! Integrating your mobile experience with your SharePoint site has never been easier. You can open, edit and save documents right from your phone.

Edit your SharePoint site on the go.
