# Brand Guidelines

This document contains the rules for our visual communication system. Follow these rules strictly to maintain brand consistency.

This includes all of the elements you may need—logos, typefaces, colors, and more—to create a consistent tone, look, and feel for Sidecar’s materials. We invite you to absorb this information and reference it often to become an informed keeper of the brand.

## Logo Mark

This character illustration style mark is what puts the “grunt” in Grunt LeatherWorks sporting a skull style face mask decked out in full modern tactical headgear makes this Grunt a menace to any of his enemies.

## Logotype

Taking that classic stencil style and putting a literal sharp edge to it to give us that tough but structured feel that Grunt Leatherworks wants to emulate.

The logotype for Grunt Leatherworks features the word "GRUNT" in a large, bold, black, stencil-style font. The letters are thick and blocky, with a sharp, diagonal cut on the right side of the 'N'. Below "GRUNT" is the word "LEATHERWORKS" in a smaller, all-caps, sans-serif font, colored in a light tan or beige. The entire logotype is centered on the page.

## Lock-ups

This is the primary visual form in which Grunt LeatherWorks will be experienced by customers. It's important, especially in the beginning stages, to associate the name with the mark, and vice versa.

Only after the brand has been established can you begin to use them separately, but until then this is our bread and butter.

## Logo Color

The color logo options are the primary logo colorways to be used. The full color logo is the preferred version and should be used whenever possible.

When a limited number of colors are available, choose the single color version. Only black or white should be used.

# Whitespace

The importance of whitespace around brand elements and throughout all layouts cannot be overstated. It adds confidence and clarity to the visual messaging. The more, the better. These visuals are used to define minimums.

The minimum whitespace around the mark and lock-up is equivalent to the mark scaled down to 50%.

## Minimum Sizes

For readability, scale needs to have special considerations. Do not reduce these elements below these designated pixel values.

# Color Palette

The core palette will cover the majority of your needs. It's intentionally small in variety so as to not dilute the brand visuals, which adds confusion.
