neue OS Icons
by Alexandra Schwarzwald

neue OS Icons is a font to personalise app icons on your iPhone. The family of six weights enables you to style your iPhone screen in multiple ways: as a collection of stylised icons in outlined and filled variants or as a purely typographic setting with one or two letter icons. And if you want to crank up to eleven superimpose a grid onto each icon. Caution though: Nerd alert!

The *neue OS Icons* was designed in a similar fashion as *neue UXUI Icons*. Unobtrusive and elegant in appearance with legibility and distinctiveness in mind. *neue OS Icons* covers all 26 Apple categories from entertainment, social networking to navigation and many more. You have the choice between two and ten different icons for each category in order to make your phone truly unique and personal.

To do so just download our Adobe Illustrator template which features all 260 stylised icons, 144 one letter-icons and 100 two-letter icons. Export as PNG and start personalising your iPhone. Not sure how? Watch our short video on YouTube that walks you through all steps.

A picture is worth a thousand words. To spare you the thousand words we've created a PDF that showcases all available *neue OS Icons* with their names and categories. This is especially handy if you want to use typographic symbols.

Want to test *neue OS Icons* before you buy? Request fully functioning trial fonts here: hi@neuefoundry.com or visit us on neuefoundry.com for more. Looking forward hearing from you!
