

Welcome to Krapka UI System [v2.0]

interactivedesign.io/krapkasystem

🕒 1,400+ components 🎨 110+ styles 🔗 100+ variables 📦 2,000+ icons

How to speed up your work

This project was born out of a problem we encountered before every project. We explored a wide range of Figma interface kits, but they were either not of sufficient quality or lacked flexibility. We were searching for the "perfect starting kit" to efficiently kickstart new projects and design systems, one that would eliminate the need to start from scratch every time.

To solve these problems, we developed Krapka UI System. We have carefully thought through everything you need to create modern and aesthetically pleasing interfaces and websites, combining them into one impeccably organized package. We have intentionally designed it to be neutral, flexible, and easily scalable so that it can be a starting point for any project.

With this set of interfaces, you can confidently use it in an unlimited number of projects.

We encourage you to try it out for your next project - just instal your Krapka UI System and customize it to your specific needs!

Solution. What tasks can it be used for?

Starter UI Kit for new product development

With Krapka UI System, you can use it as a starting kit to create new products, either for yourself or your clients. This library saves a significant amount of time by eliminating the need to create standard interface sets from scratch. All you need to do is choose colors, fonts, and you're ready to assemble your project!

Creating complex SAAS interfaces

Accelerated development of complex SAAS products is the main advantage of Krapka UI System. With this library, you will have pre-configured and optimized components that are perfectly adapted to the intricacies of building SAAS products.

Creating landing pages

With the set of components and blocks from this library, you can easily create landing pages quickly. Focus on UX and marketing, spending less time on UI routine tasks!

Client projects development

With this library, you can simplify product development for your customers, avoid routine tasks, and improve the quality of the interface by spending more time on UX and architecture.

[!] Install library

1. Add files to Figma 📁

- Download the latest **Krapka UI System** release →
- Unzip the archive and find Figma files with **.fig** extension →
- Open Figma in the app or a browser →
- Go to your home page or a project →
- Drag downloaded files ↔

[\[Figma instruction\]](#)

2. Publish libraries 🚀

To make components and styles available for usage in your projects, open each library and click on the file name's dropdown. Then, select **"Publish library"**.

[\[Figma instruction\]](#)

3. Use libraries 🗨️

To use Krapka UI System in a Figma file, open the file where you want to use it. Then, go to the **Assets** tab, click on the **Library** icon, and **enable** Krapka UI System librarie.

Licensing agreement

You have the permission to utilize the FREE, PRO, and Team versions of Krapka UI System across limitless projects for personal and client use, including commercial ventures such as websites, products, and apps, along with personal projects. Your acquisition or download of Krapka UI System constitutes your acceptance of the following licensing terms.

You are NOT allowed to

- ✗ Selling, sublicensing, distributing, or granting rights to the files or assets within the files, whether in their original or modified form.
- ✗ Share or make the files or assets within the files available online.
- ✗ Sharing the item link publicly on the web or distributing it with Figma public access is prohibited.
- ✗ Redistribution of the Item as stock, within tools, templates, or source files is strictly prohibited. This encompasses crafting templates or libraries for other platforms (e.g. Webflow, HTML, CSS, React, Tailwind, and similar platforms) using the Item. This prohibition applies to the Item on its own or bundled with other items, regardless of modifications made.
- ✗ For those with individual licenses, it's not permissible to publish the item in your team library or grant editing permissions to others. If multiple individuals are using the file, a team license must be acquired.
- ✗ You're not allowed to redistribute or offer the Item as-is or with minor alterations.
- ✗ You are prohibited from allowing an end user of the final product to extract and utilize the Item separately from the end product.

Enforcement

The copyright for Krapka UI System is held by Interactive Design. This license grants you only the permissions specified herein. All other rights are reserved.

Interactive Design retains the authority to seek legal recourse for any unauthorized utilization of Krapka UI System beyond the bounds of this license. This applies particularly when assets are employed to generate a rival product (such as a library, UI kit, or templates) or shared online.

Limitation of liability

Interactive Design's responsibility to you for expenses, damages, or other losses stemming from your utilization of Krapka UI System, including third-party claims against you, is restricted to a reimbursement of your purchase.

Interactive Design cannot be held accountable for any incidental damages linked to your usage of Krapka UI System.

Support
